

Color Stays In. Stains Stay Out.

Ameripolish® Surelock™ Stain Protector
Designed for Polished Concrete

Engineered For Lasting Beauty

Polished Concrete Color System

Getting color into the slab is only half the job. It has to be protected 24/7 from things that might damage or alter it: water, solvents, vinegar, pickle juice, UV rays, and more.

Ameripolish Surelock Stain Protector does the job like no other.

SureLock Stain Protector Lets Your Beautiful Project Keep Its Promise

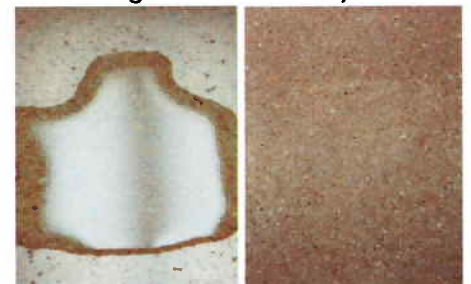

This penetrating stain repellent is specifically formulated to protect polished, dyed concrete from oil and water-based stains and acidic etching agents

- Bonds with the other SureLock Color System components.
- Contains UV stabilizers to help protect against fading.
- Contains reactive components that resist moisture and harmful chemicals, to help protect against color damage, migration or dissipation.
- Low-odor, non-flammable, VOC compliant (< 40g/l)
- Slip-resistance compliant
- Superior clarity
- Excellent chemical resistance
- Won't turn white even if it gets wet before fully curing.
- Fast applying
- Ready for foot traffic within hours
- Enhances color depth and polish lustre

Help that floor keep its glossy, colorful promise by renewing the Stain Protector application on a regular basis. A two year or more frequent renewal cycle will keep your customer's floor brilliant and beautiful.

The extreme etching test: vinegar allowed to dry.

Left: 10 minutes after exposure, no penetration. Right: Hours later, the vinegar has dried and there is little or no visible color damage.
